

SUNDOG

SUNDOG INTERACTIVE

5320 W 23rd St Ste 375, St. Louis Park, MN 55426

Sometimes cold climates create atmospheric anomalies. Sundog Interactive is named after one of these cold climate atmospheric anomalies but unlike sticking your tongue on a frozen flagpole, it is (and they are) more miraculous. A sundog is simply caused by the refraction of sunlight by ice crystals in the heavens and Sundog Interactive simply helps B2B companies accelerate results through smarter marketing, brand strategy, content strategy, development, and UX. Tanek just made sure they looked amazing while doing it. They worked with Hillcrest Development to transform an old Nestlé building into a man-made, jaw-dropping anomaly. And it can be seen in all types of weather conditions, *no mittens required*.
